Global Warming's Comeback

Listen ▶ ■   American Accent [▾]   🔊 ⚙ ⬇ «

Section:
The Brief
Explainer

It may not have always felt like it, but **global warming** slowed in the decade before 2010. Temperatures rose just 0.09°F, down from 0.2°F average growth in each of the six previous decades. Now a new study by the U.K's Met Office says the "hiatus" has ended and predicts the next two years will be the hottest on record

[This article consists of an illustration. Please see hardcopy of magazine or PDF.]

1. A PAUSE IN **WARMING**

Researchers say a number of factors may have contributed to the hiatus. For one, volcanic eruptions released gases blocking the sun's rays from heating up the earth's surface. Shifting climate patterns in the world's oceans have also strengthened trade winds, leading the earth's oceans to absorb heat.

2. THE HEAT IS ON AGAIN

The Met Office says El Niño's climate pattern, which will continue this year and next, will increase Pacific Ocean temperatures, while humans continue to emit greenhouse gases that contribute to **global warming**.

3. TEPID RESPONSE

When writing a research paper, you must cite any information or quotes that did not come from you. Citations direct readers to the complete information regarding the work. Even if you paraphrase information but do not use the exact quote, it must be cited.

The **Cite** tool makes citing information easy by providing formatted citations in a wide range of popular formats, including MLA, AMA, and APA.

To begin, click the **Cite** link in the **Tools** menu of the Detailed Record or Full Text view of your article.

Please note, as citation formats are frequently updated, you should always consult your library resources for exact formatting and punctuation guidelines.

In addition, if you would prefer to export a citation to Bibliographic Management Software such as EndNote or ProCite, you can do this using the **Export** feature, also available in the **Tools** menu. You can also add multiple articles to the folder and Export their citations all at once from within the folder.

EBSCOhost Research Databases

EBSCO*host* is a powerful online reference system accessible via the Internet. It offers a variety of proprietary full text databases and popular databases from leading information providers.

The comprehensive databases range from general reference collections to specially designed, subject-specific databases for public, academic, medical, corporate and school libraries.

[View A Tutorial On This Topic »]

EBSCO Support Site

EBSCO's Support Site is available 24 hours a day, 7 days a week. Our FAQ database, tutorials, and user guides can provide answers to your technical questions.

EBSCO Customer Support Representatives are also available by phone and e-mail 24 hours a day, Monday through Friday, as well as Saturday and Sunday from 9 a.m. to 5 p.m. (US EST).

How to Use Help

- When the Help icon 🔵 appears, you can click the icon and help for the screen you are on will display.

- To obtain help for the database(s) you are searching, click the Help icon 🔵 to the right of the **Find** field and click on the Database name at the bottom of the left-hand side of the Help window. Database help is also available from the Choose Databases window.

- To view the entire Help System, click the Help link at the top right-hand corner of the screen.

Note: The recommended screen resolution for EBSCOhost is 1024 x 768.
